

MicroSaf⁵⁰⁰

GO TECHNOLOGY®

Description

Microsaf® 500 is a thermoresistant multi-strain probiotic, combining 3 proprietary strains: *Bacillus amyloliquefaciens*, *Bacillus licheniformis*, *Bacillus pumilus*.

Microsaf® 500 benefits from the unique patented GO Technology® (US 9,447,376, US 9,932,543 & EP 2 954 041) developed to optimize early spore germination and activity in the gastro-intestinal tract at acidic pH.

Typical profile

Total *Bacillus* cells 2.0×10^8 CFU/g

Physical characteristics

Appearance	Fine powder
------------	-------------

Recommendation

Broiler	250 -500 g/t of feed
Layer & breeder	250 -500 g/t of feed

Incorporation rate to be adapted to specific needs.

Packaging and Storage

Packaging: 20 or 25 kg polyethylene bag, packed in corrugated cardboard box

Shelf life: 18 months from production date, in original packaging.

Storage: keep in a dry and cool place for optimum preservation.
