

MINAZEL® PLUS

DESCRIPTION

MINAZEL PLUS is a unique EU patented technology product based on organic modification of mineral clinoptilolite surface, effective against polar and less polar mycotoxins. Efficiency is characterized by rapid adsorption of the product after contact with the mycotoxin and in different pH values of the digestive tract.

ACTION

- ✔ Effectiveness against mycotoxins in more than 50% during the first 5 minutes.
- ✔ Effectiveness against mycotoxins in more than 75% during the first 30 minutes
- ✔ Effectiveness against mycotoxins in more than 90% during the first 60 minutes

EFFICACY

Effective against a broad spectrum of mycotoxins (Aflatoxins, Ochratoxin A, Fumonisin, T-2, Zearalenone, Ergot alkaloids)

USE

1-2 kg per ton of feed

COMPOSITION

Organically modified clinoptilolite

ADVANTAGES

- ✔ MINAZEL PLUS is a result of unique patented technology of clinoptilolite surface organic modification.
- ✔ Fast speed of adsorption of broad spectrum of mycotoxins.
- ✔ Product adsorption is stable in different parts of intestinal tract (different pH levels) without significant levels of desorption.
- ✔ MINAZEL PLUS is selective. Does not bind vitamins, minerals and micronutrients.
- ✔ Proven efficacy for all animal species under various climatic conditions (tested all over the world)
