

SafGlucan

Purified yeast 1,3 and 1,6 beta-glucans

Data Sheet

Description:

Safglucan® is a purified yeast fraction rich in beta-glucans (1,3 and 1,6), obtained from primary grown proprietary strain of *Saccharomyces cerevisiae*. In vitro research has shown the effect of purified 1,3 and 1,6 beta-glucans on innate immune cells training. This mode of action may explain the benefit of Safglucan to support the animals natural defenses or help to optimize response to vaccination .

Typical profile:

Active components

β -1,3/1,6-glucans	$\geq 50 \%$
--------------------------	--------------

Nutritional

Moisture	$\leq 6 \%$
Crude protein	$\leq 10 \%$

Microbiological

<i>Salmonella</i> /25g	Negative
------------------------	----------

Physical characteristics

Odor	Typical yeast odor
Appearance	Powder

Recommendation

Ruminant	10 g/head/day
Poultry	125 g/ton of feed
Swine	125 to 500 g/ton of feed
Aqua	0.4 to 1.2 kg/ton of feed
Pet	0.25 to 1 kg/ton of feed
Horse	2.5 to 5 g/head/day

Packaging and Storage

Packaging: 10 kg cardboard box containing 2 individual multilayer bags of 5 kg.

Shelf life: 2 years from production date, in original packaging.

Storage: keep in a dry and cool place for optimum preservation.
