

BEST-START™ ELECTRO-CALF™

2-IN-1 POWDER SUPPLEMENT

Oral, non-antibiotic, zero-bicarb, supportive measure (isotonic energy and mineral salt supplement) for calves. Fortified with a Vitamin tonic, plus Betaine, Zinc and high-dose micro-encapsulated Probiotics for calves.

Features:

- ✓ Comprehensive supportive measure combining electrolyte and probiotic feeds
- ✓ Does not contain Sodium Bicarbonate, so can be fed immediately before or after milk feeds
- ✓ Highly palatable and rapidly absorbed formulation
- ✓ Endorsed by leading industry professionals and specialists
- ✓ Bonus: this next generation, comprehensive, electrolyte supplement is the first of its kind in Australia. Until now – access has been restricted and exclusively available via veterinary clinics
- ✓ Now available over-the-counter from leading rural resellers nation-wide!

Benefits:

- ✓ Convenient all-in-one supportive measure
- ✓ Versatile formulation with both isotonic and hypertonic mixing rates
- ✓ Exceptional value versus other commercial alternatives – do the maths per dose!
- ✓ Quicker responses and turnaround observed
- ✓ **RAPID RECOVERY. RAPID REHYDRATION.**

ELECTRO-CALF™

2-IN-1 POWDER SUPPLEMENT

ACTIVE CONSTITUENTS

DEXTROSE

Provides dextrose and glycine as an energy source to efficiently replenish glucose levels to correct hypoglycaemia and stimulate electrolyte and water assimilation.

SODIUM ACETATE

Rapidly metabolised, it gives an immediate energy hit (sodium bicarbonate doesn't) and it has adequate alkalising levels to correct acidosis without inhibiting milk clotting. Acetate are volatile fatty acids which can facilitate sodium and water absorption in the calf's small intestine. It also inhibits the growth of Salmonella species.

SODIUM CHLORIDE

Restores sodium and is a major factor in the assimilation of water to effectively correct dehydration.

POTASSIUM CHLORIDE

Restores normal intracellular potassium levels to correct hypokalemia (low potassium in the bloodstream).

PLUS ADDED

GLYCINE

Promotes intestinal absorption of water and sodium, and it is a non-essential amino acid, which is used to transport energy to the calf.

BETAINE

Osmoregulator to aid hydration and gut wall integrity.

VITAMIN TONIC

For a diverse role in metabolic functions:
A, D, E, C, B1, B2, B3, B5, B6, B9, B12

ZINC

Improves immune support.

PROBIOTICS

Advanced and diverse proprietary blend of micro-encapsulated host-specific probiotics at no less than 5 billion CFU per dose; strains include:

- ✓ *Saccharomyces boulardii*
- ✓ *Saccharomyces cerevisiae*
- ✓ *Lactobacillus (acidophilus, plantarum, casei, reuteri)*
- ✓ *Enterococcus faecium*
- ✓ *Clostridium butyricum*,
- ✓ *Bacillus (subtilis, coagulans)*
- ✓ *Bifidobacterium (longum, bifidum)*

5

BILLION CFU / DOSE

DIRECTIONS FOR USE

PRECAUTIONS

It is essential that animals have access to free-choice fresh water at all times, even when feeding electrolyte solution.

Mixed solution can be fed via a teat or alternatively is safe to tube for non-suckling calves.

To be fed as a supplement between normal milk/milk-replacer feeds.

ADMINISTRATION

Follow veterinary instruction otherwise use the following mixing rates:

Isotonic Solution – routine usage:

Dissolve 60g (1 heaped scoop) of powder in 2L of warm water (40°C).

Hypertonic Solution – veterinary cases:

Dissolve 80g (1.5 heaped scoops) of powder in 2L of warm water (40°C).

CALVES

Feed 2 litres of ELECTO-CALF solution, 2-3 times per day between milk feeding for 1-2 days or until hydration is normal or follow veterinary advice.

General Health & Condition

For best results, add BEST-START THRIVE to milk feeds from Day 2 to Weaning. Specifically designed to deliver essential vitamins, organic minerals, prebiotics, probiotics and protozoa cover (cocci & crypto). Lays the foundation for future health, growth and development.

LAMBS, KIDS, CRIAS

Lambs, kids and crias require smaller dose volumes (100-200mL) more frequently (up to 6 times per day) for 2 to 3 days until hydration is normal or follow veterinary advice.

DOGS & CATS

Offer fresh solution using the following guide:

Cats & Miniature Dogs (up to 5kg)	125mL 2-3 times daily
Small Dogs (5kg-10kg)	250mL 2-3 times daily
Medium Dogs (11kg-20kg)	500mL 2-3 times daily
Large Dogs (Over 20kg)	750mL 2-3 times daily

WITHHOLDING PERIODS: Meat & Milk: Zero (0) days.

EXPORT SLAUGHTER INTERVALS: Zero (0) days.

DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL.

PACKS:

600g Jar = 10 isotonic calf doses

4kg Pail = 66 isotonic calf doses

10kg Pail = 166 isotonic calf doses

20kg Pail = 333 isotonic calf doses
