

NatriSORB™ - AG

Bedding Solutions

Ultra-absorbent
bedding conditioner
& drying agent.

The ultra-absorbent bedding conditioner and drying agent for all animal species.

NatriSORB is a unique bedding (litter) conditioner and drying agent designed specifically to improve animal welfare and provide a management tool to support bio-security challenges and requirements of intensive agricultural systems.

The proprietary formulation was specifically designed to deliver a product to meet the following criteria: (1) uncompromised safety standards for both operators and livestock, (2) target the reduction of moisture, ammonia and odour thus creating a hostile environment for pathogens to thrive, (3) improve animal welfare and comfort, (4) create an environment comfortable for operators, and (5) deliver this cost-effectively. The outcome: a ultra-absorbent conditioner coupled with a unique blend of essential oils resulting in optimal performance, safety and has been flagged as the new industry standard!

- ✓ Creates a dry, safe, healthy environment by reducing moisture and the potential for bacterial infection
- ✓ Significantly reduces the moisture in bedding by absorbing up to 320% its weight which promotes animal welfare through cleaner, drier animals
- ✓ Natural ingredients are safe to handle and are non-irritant to animals and humans
- ✓ Reduces ammonia levels and odours; lowers the common trigger for pneumonia (respiratory disease) and improves the overall comfort and environment of housing systems
- ✓ Unique blend of essential oils (including Citronella) aids odour control and provides hostile environment for pathogens and insects

The new benchmark & industry standard!

Up to 10 times more absorbent than lime and other natural desiccants.

NatriSORB™ Facts

- ✓ Improves animal health and welfare
- ✓ Promotes good udder and hoof health
- ✓ 10 times more absorbent than lime
- ✓ Up to 7.5 times more absorbent than competitor products
- ✓ OH&S friendly – non-caustic, non-irritant & chemical-free
- ✓ Safe to use for both operator and livestock
- ✓ Safe to use while animals are in the pen
- ✓ Pleasant odour aids environment and worker comfort
- ✓ Non slippery when wet
- ✓ Does not stain
- ✓ Extends life of bedding
- ✓ Environmentally friendly
- ✓ Safe to add to mulch or compost material
- ✓ Technical support available
- ✓ Available from leading rural stockist

NatriSORB™ vs. Lime

Features	Lime	NatriSORB™
Absorption By Weight	32%	320%
Ultra-Water Absorbent	X	✓
OH&S Friendly	X	✓
Reduces Ammonia	X	✓
Aids Odour	X	✓
Contains Citronella	X	✓
Cost Effective	X	✓

Suitable for all animals

Species	Applications
Cattle	Calf sheds, calving pads, stalls, transport trailers, showing
Goats, Sheep, Alpacas	Bedding, transport trailers, shelters
Horses	Stables, horse boxes, trailers & floats
Poultry	Litter and nesting boxes (Breeders, Laying Hens, Meat Poultry & Game Birds)
Pigs	Drying agent for newborn piglets, farrowing houses, nurse, sow pens
Dogs	Beds and kennels
Cats	Cat beds and litter trays
Small Pets	Hutches and cages
General	All types of housing including livestock trailers

Directions for use

- Apply to floor immediately after cleaning (after wet disinfectant has dried), or apply directly to the bedding
- Suitable for application by hand or blower
- Recommended rate: 50g/m² (25kg/500m²)
- Safe to increase rate when applying directly to wet/soiled areas or as part of a managed bio-security/animal-health programme

Storage

Store in a cool, dry place. Keep away from moisture and direct sunlight. Close securely after use.

Packs

25kg Bag | 45 Bags per Pallet

Programme

For best results use NatriSORB™ in conjunction with an aerial disinfectant and/or disease preventative:

ViralFX™ (Broad Spectrum Virucidal, Bactericidal, Fungicidal Disinfectant & Cleaner)

- Kills 500 disease causing pathogens: 400 bacteria and 100 viruses

BDAH® (Biological Odour and Disease Management)

- Stimulates biological reactions responsible for digestion of organic residues and the direct neutralising and digestion of key odour substances which cause stress and secondary issues in intensive animal growing situations.
- This product also balances the ecosystem to enable sustainable management of fungal blooms.
- Stimulates digestion of hydrogen sulphide and ammonia.
